

TBAYS North Storm U11- U13 Players Philosophy

Golden Age of Learning. The vision is to play fundamentally good soccer and to play a nice passing game where players can interchange positions and can be comfortable on the ball. The team shall always have a combative attitude and compete for every ball. Be able to compete, be able to adjust when a goal up or down and understand how to play various formations.

We will establish a positive mentality throughout the club by being prepared to deal with wins and losses and continually push ourselves to do better with positive and corrective feedback, team discussions and on going evaluation.

We will try to make players self-reliant learners who are involved and included in their own learning process. We will always try to make practices engaging, competitive, fun and dynamic so the best is continually brought out of the players in a safe and educational environment. We want players to show their passion, love and enjoyment of the game. Players should feel the freedom to express themselves and have no fear of failure.

The coach-player relationships will continue to develop, be firm, fair and friendly. We will have an open door policy with the players and parents alike where they can air their concerns. By running the team this way it will impact players as they know they can come to their coach in any circumstance or situation and trust them with issues and concerns. We will set high standards together and adhere to them. We will respect officials and our opponents and never underestimate them. Player 1st, team 2nd, age group 3rd and club 4th by doing this we will look after all aspects of development.
